TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS

Tools/Software: React / Redux, Git, Bootstrap, Node, SQL, Microsoft word, ppt, excel.

TECHNICAL PROJECTS

Okayest Watches | Dev | 12/23 | https://github.com/oK-ayest-Coders/oK_ayestWatches

- Creating a e-commerce site that sells watches.
- Used technologies like bcrypt, JWT, Prisma, and node/express.
- The cart function was the most challenging aspect of this project.
- For this I learned how to work with a team, getting over conflicts and struggles to meet deadlines

EXPERIENCE

Back-end Engineer | JPMC | Jersey city, NJ

02/2020 - 08/2020

- Worked on a huge data storage project, Where I was responsible for the entitlements of this project.
- Worked on Unit testing using Junit and Mockito.
- Used Hibernate as a framework with Maven to handle dependencies.
- Used Relationship modeling and system design principles.
- We were also able to reduce costs and centralize data into one DB.

Front-end Engineer | JPMC | Jersey city, NJ

11/2020 - 04/2022

- Worked with Typescript and React to design frontend for an analytics application.
- Worked on timeline of application adding dynamic feature so users can interact with it.
- Worked on the search bar feature for the UI application.
- Started writing SQL queries to test UI and features before using real-time data.
- I was responsible for the Onboarding and Off-boarding of team members from projects.

Site Reliability Engineer | JPMC | Jersey city, NJ

04/2022 - 12/2023

- Executed and monitored health checks using Apica and App Dynamics.
- Solved user issues and helped automate processes reducing toil.
- Used Tomcat to restart/shut down servers as needed.
- Automated Kubernetes deployments using GKP.
- Helped migrate to a new system we are using which is still in progress.
